EDUCATION

S.A. Engineering College, Avadi, Chennai - 77

Bachelor's, Computer Science and Engineering (AI & ML)

August 2023 - May 2027

CGPA: 7.93(as of semester 5)

Kendriya Vidyalaya HVF Avadi, Chennai - 54

AISSCE (HSC)

August 2021 - May 2023

Agg. % : 81.00

Kendriya Vidyalaya HVF Avadi, Chennai - 54

AISSCE (SSC)

April 2011 - August 2021

Agg. % : 94.80

PROFESSIONAL EXPERIENCE

Heavy Vehicles Factory

Student Intern

Avadi, TN, India

June 2025 - June 2025

- Developed a **Secure File Encryption System (SFES)** using **HTML, CSS, JavaScript, PHP, and MySQL**, enabling secure file upload, storage, and retrieval in an offline environment.
- Implemented **multi-layer (10-layer) encryption and decryption algorithms** to ensure data confidentiality and prevent unauthorized access during file transfer.
- Designed and integrated a **secure authentication system** with login, registration, and session management to enforce role-based access control.
- Configured **HTTPS-based secure communication on localhost** and implemented activity logging for tracking user transactions and system events.
- Built a responsive dashboard interface for encryption, decryption, file management, and audit logs, improving usability and system monitoring efficiency.

CodeAlpha

Python Programmer Internship

Remote

August 2025 - September 2025

- Received accreditation and LoR for best performance.
- Designed, implemented, and validated software modules using Python, leveraging frameworks to meet project requirements.
- Stayed current on developments in related Python frameworks.
- Developed robust test cases to ensure software reliability under various conditions and usage scenarios.
- Tested, analyzed and resolved bug issues

PROJECTS & OUTSIDE EXPERIENCE

AetherCode

Generative AI Developer

Remote

August 2025 - October 2025

- Developed a Full-Stack AI Code Assistant: Built "AetherCode," an intelligent web-based IDE using Next.js, TypeScript, and Tailwind CSS, providing developers with AI-driven code analysis, refactoring suggestions, and error debugging across 16 programming languages.
- Engineered Advanced Generative AI Tools: Implemented a suite of sophisticated features powered by Google's Genkit and Gemini models, including code generation from natural language, automated code translation, library migration (e.g., Moment.js to date-fns, Lodash to native JavaScript), and unit test creation to accelerate development workflows.
- Built an Interactive Conversational Debugger: Designed and integrated a unique chat-based debugging system that enables users to interactively diagnose and solve complex code issues with an AI assistant that understands context, error patterns, and provides step-by-step guidance.
- Designed a Modern, Responsive UI/UX: Created a polished and intuitive user interface with Tailwind CSS, featuring a split-view code editor, a themeable workspace with light/dark mode toggle, and real-time, asynchronous feedback from AI operations.
- Integrated Multi-Modal Capabilities: Enhanced user accessibility and interaction by implementing text-to-speech (TTS) for voice-assisted AI responses in the Help & Query module and a sandboxed environment for simulating code execution directly within the browser.
- Architected a Scalable AI Service Backend: Designed and implemented a robust backend using Genkit to define, manage, and serve multiple, independent AI flows. This modular architecture allowed for seamless integration of distinct AI capabilities (e.g., code analysis, generation, translation, debugging, utilities) into the frontend, ensuring maintainability and the ability to scale services independently.

Secure File Exchange System

Backend and Database Developer

Avadi, TN, India

June 2025 - June 2025

- Designed and developed a Secure File Exchange System to enable safe file upload, storage, and download using multi-layer encryption techniques.
- Implemented user authentication and access control to ensure only authorized users can encrypt and decrypt files.
- Integrated multi-level file encryption and secure decryption on download to protect data confidentiality and integrity.
- Built a backend database system (MySQL) to manage user details, file metadata, and transaction logs securely.
- Added activity logging and audit tracking to monitor file operations and enhance system security and accountability.
- Implemented secure session handling and input validation to prevent common web vulnerabilities such as unauthorized access, SQL injection, and data tampering.

S.A.E.C. Web Application

Full Stack Developer

Chennai, TN, India

February 2026 - March 2026

- Designed and developed a full-stack web application using Node.js and Express for backend services and a modern Vite-based frontend for responsive user interaction. Implemented user authentication and access control to ensure only authorized users can encrypt and decrypt files.
- Implemented RESTful API architecture with structured routing (auth.js, api.js) to handle authentication, user requests, and data processing efficiently. Built a backend database system (MySQL) to manage user details, file metadata, and transaction logs securely.
- Implemented secure user authentication with login and registration features.
- Integrated frontend and backend for seamless data communication.
- Applied secure coding practices to prevent common web vulnerabilities.

CERTIFICATIONS

- Introduction to Modern AI (Industry Recognized Course Completion Certificate issued by CISCO).
- AI Fundamentals with IBM (Industry-Supported Course Completion Certificate issued by CISCO).
- Fundamentals of Database (Course Completion Certificate issued by Simplilearn).
- Fundamentals of Cloud Computing (Course Completion Certificate issued by UpGrad).
- Google Machine Learning Crash Course (Earned Badges issued by Google).

SKILLS

Programming Languages → Python.

Libraries/Frameworks → NumPy, Pandas, Scikit-learn, TensorFlow .

Databases → MySQL, MongoDB.

Tools/Platforms → Git/GitHub, Jupyter, PowerPoint/Slides, Excel/Sheets, Firebase.

Technical Skills → Machine Learning, Database Management, Software Development.

Soft Skills → Problem-solving, Teamwork, Adaptability.

Languages → English, Tamil, Hindi, Malayalam, German (Basics).
